Description

It would be nice if the entry text was a bit darker to increase contrast between the entry text and the entry background. The text color is appropriate when viewed on a white background, but it is a bit light against the grey.

I would suggest changing the entry text color to somewhere between #111 or #000, these maintain similar or greater contrast ratios as the current text to the white background.

For the pedantic (and because I looked it up), the current contrast ratio of 5:1 currently fails the W3C WCAG 2.0 level AAA requirement of 7:1, and barely passes the level AA requirement of 4.5:1.

History

#1 - 11/23/2016 10:09 PM - Kyle Hazelwood

- Category set to Client

- Status changed from New to Closed

- Priority changed from Normal to Low

- Target version set to Version 2.0

Changed text contrast to #222 from #444.
